APPLICATIONS

Fertilizer manufacture, and use as a pH modifier, sanitizing agent and rust converter laballey.com

Applications are drawn from published manufacturer and supplier documentation; each is sourced. Suitability for a specific use is the buyer's to confirm.

STORAGE & HANDLING

RECOMMENDED STORAGE

Keep tightly closed in corrosion-resistant containers (polyethylene, fiberglass or stainless steel, not mild steel) away from bases, bleach and metals. Store above 21 °C (70 °F) or expect crystallization; warm gently to re-melt.

HANDLING PRECAUTIONS

Use full PPE including face shield, acid-resistant gloves and apron. Add acid to water slowly with stirring; never reverse. Ventilation required.

Class-level guidance — not product-specific; the SDS controls.

INCOMPATIBILITIES

Strong bases (violent reaction); bleach and other hypochlorite solutions (release chlorine gas) and ammonia; most metals (release flammable hydrogen); sulfides, sulfites and cyanides (release toxic gases); nitromethane (explosive mixtures).
